DETAILED ACTION

1. This is in response to the Applicant's arguments and amendments filed on November 01, 2007 in which claims 1-7, 18-20, and 26-31 have been canceled. Claims 8-17, 21-25, and 32-46 are currently pending.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Daniel Kim on 11/13/07.

The application has been amended as follows:

Please delete in line 7, "the second station" and insert -- a second station -- in line 10 delete "a second station" and insert -- the second station --

Allowable Subject Matter

3. After a further search and thorough examination of the present application and in view of the applicant's arguments and amendments, claims 8-17, 21-25, and 32-46, renumbered as 1-30, are found to be in condition of allowance.
4. The following is an examiner's statement of reasons for allowance: the cited prior arts teach the transmission in a wireless local area is based on battery capacity of the

terminal. If the battery power level is low data is transmitted at low power, and if the battery power is high data is transmitted at high power.

5. On the other hand, the Applicant teaches, inter alia, recording information corresponding to the determined transmission characteristic in a message to be transmitted to the second station; and transmitting the resulting message to the second station wherein the WLAN communication is between the second station and the first station. The Applicant further teaches, inter alia, means installed at said station for determining a transmission characteristic corresponding to the checked battery power and recording information corresponding to the determined transmission characteristic in a message to be transmitted to a receiving terminal; and means installed at said station for adjusting a data transmission characteristic with the receiving terminal to the determined transmission characteristic. These limitations, in conjunction with all limitations of the independent claims, have not been disclosed, taught, or made obvious over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
